

We are the leading manufacturer of world class and reliable *Plastic Extrusion Machines*. We produce a wide variety of plastic processing, extrusion, recycling machines with excellent melt homogeneity that are used by several processors globally. We would like to help you in the best possible way with all our products & services. Below is a brief introduction of who we are & what we do –

About Us:

KBM stands not only for state-of-the-art recycling machine manufacturing and innovative technologies, but also for more than three decades of experience in the production of extruders and extrusion equipment. Founded in 1989, the family-owned business has been exporting machines worldwide for more than 30 years.

We plan, design and install extrusion lines with perfectly coordinated components that feature high output combined with excellent end product quality all along the line that makes us a market leader in single screw extruder technology.
